Founder & Chief Technical Advisor

Goldtending Inc.

Founded GoldTending to develop a platform for aspiring young entrepreneurs.

Advisory Board for the Strategic Artificial Intelligence Program at the University of Colorado, Colorado Springs

UCCS-Women's College

Board members make a number of contributions to the program, including:

Preserving and enhancing the reputation and quality of the program through strategic review of credit and noncredit offerings to the community, as well as helping to build value to the business community.

Offering expert guidance to faculty and students through occasional classroom visits, forums and conferences, and input on programs.

Promoting the program's goal of linking industry with academia to help ensure that the work is relevant and benefits the business community.

Technologies: JavaScript, Next.js, Firebase, Supabase, OpenAI, Node.js, React, TypeScript, Vue.js

Tools: Vitest, Jasmine, Anthropic, Netlify, Cloudflare, Tailwind CSS, Git, GitHub

Senior Quality Assurance Engineer

Trimble / SketchUp

Played a critical role in delivering high-quality software products for designers and architects worldwide. Was responsible for designing, developing, and executing comprehensive test plans, identifying defects, and collaborating with development teams. My expertise contributed to improving testing processes and ensuring the robustness of SketchUp's 3D modeling API.

Technologies: Ruby, C++, JavaScript, Node.js

Tools: Atlassian Suite, Visual Studio, RubyMine, Cypress, Sauce Labs, Git, GitHub, Postman, Minitest, Doxygen

Additional Roles: Agile Scrum Master, Team Lead

Senior Engineer

ClickBank

As a key member of the team, was instrumental in automating and streamlining the software development lifecycle. Designed and implemented CI/CD pipelines, managed cloud infrastructure, and ensured the reliability and scalability of our affiliate marketing platform, enabling rapid and dependable software delivery.

Technologies: Ruby, Cucumber, Nutch, Apache Tomcat, AWS, Java, Liquibase, Docker, Doxygen, Zeus/Azul

Tools: Atlassian Suite, IntelliJ, RubyMine, NetBeans, Cypress, Sauce Labs, Swagger, Postman, Git, GitHub, BitBucket

Additional Roles: Agile Scrum Master, Team Lead, Buildmeister

Co-Founder & Director of IT

Rebit Inc.

Co-founded Rebit and was part of the engineering team that created a groundbreaking, simple, and automatic backup solution for consumers. We developed a "ridiculously simple" backup appliance that required no user intervention, fundamentally changing the landscape of personal data protection.

Technologies: Ruby, Cucumber, C++, Delphi, PostgreSQL, Access, Oracle, MSSQL, Oracle Business 1

Tools: Atlassian Suite, Cypress, Sauce Labs, Postman, MercurialHG

Additional Roles: Agile Scrum Master, Team Lead, Software Configuration Manager

Exit: Rebit was acquired by Betsol / Carbonite for \$25 Million

Database Consultant / System Architect

World Bank International, Nile Basin DSS.

The Nile Basin Decision Support System (NB-DSS) is a platform developed by the Nile Basin Initiative (NBI) to facilitate cooperative planning and management of the Nile River's water resources by providing data, analytical tools, and modeling capabilities for Integrated Water Resources Management (IWRM). It serves as a central repository for data and offers advanced tools for scenario management, optimization, and multi-criteria decision-making, aiming to support riparian countries in reaching consensus on sustainable water resource development projects.

Engineered and executed the migration of a core system to a PostgreSQL and Ubuntu Linux environment. This strategic shift away from proprietary Microsoft and Oracle solutions created a sustainable, self-supporting infrastructure while achieving substantial reductions in operational licensing costs.

Technologies: MS Server, MSSQL, Unix, C++, .Net, Postgres, Ubuntu Linux, Access

Tools: SpiraTest Suite, Visual Studio, Visual Studio Code, MercurialHG, Windows Hardware Lab Kit (HLK), SignTool, WHQL (Windows Hardware Quality Labs)

Consultant / System Architect

TC-Solutions

Converted IT infrastructure from physical on-premises to the AWS cloud. Designed and built the initial front-end website.

Technologies: MS Server, MSSQL, Access, AWS

Tools: WordPress, Visual Studio, Visual Studio Code, Git

Co-Founder & Director of Quality

Benchmark Tape Systems

Co-founded the company and spearheaded the engineering efforts to develop and validate the DLT1 tape drive, a high-capacity data storage solution. My participation was crucial in taking the product from concept to market, establishing a new standard for reliable and efficient data backup for businesses.

Technologies: MS Server, MSSQL, PostgreSQL, OBDR, Unix, Linux, C++, .Net

Tools: TrackStar, Visual Studio, TortoiseSVN, Windows Hardware Lab Kit (HLK), SignTool, WHQL (Windows Hardware Quality Labs)

Additional Roles: Agile Scrum Master, Director of IT, Software Configuration Manager

Exit: Quantum acquired Benchmark in 2002 for \$56 million.

Co-Founder & Director of IT

Datasonix Inc.

As a co-founder, was part of the engineering team that created Pereos, the world's smallest and lightest tape drive. This portable data storage device was a technological marvel, offering unprecedented data mobility and backup capabilities for the time.

Technologies: MS Server, MSSQL, OBDR (One Button Disaster Recovery), Unix, C++, .Net

Tools: TrackStar, Visual Studio, Windows Hardware Lab Kit (HLK), TortoiseSVN, SignTool, WHQL (Windows Hardware Quality Labs)

Additional Roles: Team Lead, Software Configuration Manager, Buildmeister

Award: Patent Number 5,960,460 for Non-Intrusive Replication of Hard Disk – a disaster recovery / data replication computer program

Exit: Datasonix was acquired by Exabyte for \$20 million.

Senior Software/Firmware Engineer

StorageTek

Contributed to the development of cutting-edge storage systems, including the innovative Iceberg, a totally redundant, fault-tolerant disk system. Work in tools and software engineering was vital to the functionality and reliability of these large-scale data storage solutions, which were used by major corporations worldwide.

Technologies: MS Server, MSSQL, LSTC2VM, HP-UX, Unix, Linux, C++, ASP, ASP.NET, PHP, C#, Perl and VBScript

Tools: TrackStar, Visual Studio, Atria, SourceSafe, Windows Hardware Lab Kit (HLK), SignTool, WHQL (Windows Hardware Quality Labs)

Additional Roles: Agile Scrum Master, Team Lead

Awards: Technical Innovator of The Year. Malcolm Baldrige Quality Award

Exit: Sun Microsystems acquired Storage Technology Corporation (StorageTek) in August 2005 for US\$4.1 billion.

StorageTek, founded in 1969, was a global company that developed and manufactured data storage hardware and software.

Aerospace Power Design Engineer

Technetics Inc.

Designed and built mission-critical power supplies for the nation's most advanced defense and aerospace platforms. Projects included developing power systems for the Space Shuttle (NASA), nuclear submarines (U.S. Navy), and Black Ops helicopters (U.S. Air Force), all requiring the highest levels of precision and reliability.

Skills:

- Experienced in designing radiation-hardened power systems for space applications.
- Familiarity with power requirements for secure communications and sensitive electronic equipment.

- Proven ability to mentor junior engineers and lead technical projects.

Technologies: C, C++, i386 Assembly, MIL-STD-1495

Tools: Aztek Compiler, AT&T Compiler

Additional Roles: NASA Qualified Assembler, Quality Control

Site Engineer/Program Director

KGNU 88.5 FM Boulder

At KGNU Community Radio I was able to fill the unique, combined role of Site Engineer & Program Director. In this leadership position, I was responsible for both the technical integrity of our broadcast signal and the creative vision of the on-air programming. Acted as an advocate for independent media, utilizing a blend of technical expertise and a strong sense of community-focused content curation. I was responsible for ensuring KGNU's broadcast was reliable and high-quality while also guiding the volunteer programmers to create content that fulfilled the mission to educate, entertain, and serve as a platform for underrepresented voices and music.

FCC License: KA0JHK

Engineering Responsibilities:

Maintain Broadcast Systems: Oversee the maintenance, repair, and installation of all broadcast equipment, including studio consoles, microphones, transmitters, antennas, and remote broadcast gear.

- **Ensure FCC Compliance:** Serve as the station's Chief Operator, ensuring full compliance with all FCC technical regulations, maintaining station logs, and performing required EAS tests.
- **Manage IT Infrastructure:** Supervise the health and performance of station computers, servers, networking equipment, and the audio automation system.
- **Troubleshoot & Repair:** Provide timely and effective troubleshooting for any technical issues that arise, minimizing off-air time and resolving equipment failures.
- **Strategic Technical Planning:** Research, propose, and implement technology upgrades to improve broadcast quality and station capabilities.

Programming Responsibilities:

- **Program Curation & Scheduling:** Develop, manage, and oversee the weekly on-air program schedule, ensuring a diverse and engaging mix of music, news, and public affairs programming.
- **Volunteer Management:** Recruit, train, and provide ongoing support and mentorship to KGNU's large and diverse team of volunteer programmers.
- **Content & Mission Alignment:** Ensure all on-air content reflects KGNU's core mission of diversity, inclusiveness, and providing a platform for overlooked perspectives.
- **Quality Control:** Monitor on-air sound and programming to ensure a high standard of quality and professionalism.
- **Community Engagement:** Act as a liaison between the station and the community, actively seeking out new programming ideas and talent that reflect the diversity of our listenership.

Education

University of Colorado, Colorado Springs

Strategic Artificial Intelligence Program.

University of Denver, Denver, CO

Daniels Professional Development Program.

Berklee College of Music, Boston, MA

Music Production.

University of Colorado, Boulder, CO

Leeds School of Business Management.

Regis University, Denver, CO

Management Information Systems/Business Minor.

University of Colorado, Boulder, CO

Electrical Engineering Studies.

Coaching

University of Colorado

Assistant Coach/Goalie Coach - CU Women's Team - NCAA Nationals

USA Hockey

Master - Level 5

020500370 - Master's Thesis: My Stance On Goalies

Golden High School, Golden, CO

Assistant/Goalie Coach - Varsity - State Champion.

Hyland Hills, Westminster, CO

Major A - International Silver Stick Champion.

Hyland Hills, Westminster, CO

Assistant/Goalie Coach - Bantam B - State Champion.

Hyland Hills, Westminster, CO

Assistant/Goalie Coach - Minor A - State Champion.

Boulder Hockey Club, Boulder, CO

Head Coach - Major A

Fairview High School, Boulder, CO

Head Coach - Varsity

Thundercats Volleyball, Thornton, CO

Video Coach - AAU - Ranked 7th in the Nation
